Approach flow screen SPC

Approach flow screen SPC

The **ST Machine** headbox screens are used in the approach flow systems for the screening of all the raw materials (virgin fibers or waste papers).

The screens are centrifugal type, and the multi foils rotor has been engineered to decrease any pulsation in the headbox. Various applications with holes or slotted baskets.

Working consistencies from 0,15 to 1,5%.

Model	SPC04	SPC08	SPC20	SPC30	SPC40
Basket area [m ²]	0,4	0,8	2	3	4
Max production [T/D]	35	80	180	250	300
Work consistency [%]	0,15 ÷ 1,5%
