**Under broken pulper UTM**

# Under broken pulper UTM

In case of paper break on the paper machine the UTM **ST Macchine** pulper is the optimal solution to pulp instantaneously all the paper sheet in order to send it back to the broke system; the design of the vat is to improve pulp circulation and so better deflaking effect.

Different applications available, with one or two rotors depending on the paper machine size, with special rotor engineered for energy saving

Applications available for :

- couch pit
- press pit
- size press pit
- dryer section
- reel pit
- winder pit

Model	PSG 650	PSG 850	PSG 1050	PSG 1250	PSG 1600
Rotor diameter [mm]	650	850	1050	1250	1600
Work consistency [%]	4÷6				
Max. installed power [kW]	250	250	450	450	800
